

# Actions against Volcano Eruption

There are five active volcanoes in our prefecture, Mt. Azuma, Mt. Adatara, Mt. Bandai, Mt. Hiuchigatake, and Mt. Numazawa. Mt. Nasudake is also located nearby. These volcanoes erupted and caused damage in the past. Prepare yourself on a daily basis in case they erupt.

## What if You Encounter an Eruption?

When you feel danger, evacuate voluntarily. When you evacuate, cover your head with, for example, a cap, cover your mouth with a towel, and quickly run away from the crater.

## Watch out for Volcanic Ash

Volcanic ash causes coughing, breathing difficulty, and itchy, sore, or red eyes. Use a mask or goggles. Volcanic ash may fall thick on the ground, so drive carefully.
